Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Goetz Vincent (WO 97/403328). Goetz, Vincent discloses a method of refrigeration using a thermochemical system comprises three reversible phenomena involving the gas G in three chambers (18), (10) and (12), the respective equilibrium temperatures TE(18), TE(1) and TE(12) at a given pressure being such that TE(18) state in which the three chambers are at ambient temperature and at the same pressure in a first step, the chamber (10) is isolated and the chambers (18) and (12) are brought into communication (The valves22, 24, 26, 28, 30 and pipe s 32 and 34 connection system are so arrange the system can be places at any desires connection position) in order to carry out the exothermic synthesis in (12), the heat produced being absorbed by the chamber (10); in a second step, the chamber (12) is isolated and the chambers (18) and (10) are brought into communication in order to carry out the exothermic synthesis in (10), the heat produced being absorbed by the chamber (12); and in a third step, the three chambers are brought into communication and thermal energy is supplied to the chamber (10) in order to carry out the exothermic decomposition steps in (10) and in (12), for the purpose of regenerating the installation,

Application/Control Number:

10/521.760

Art Unit: 3744

which is then left to return to the ambient temperature. See Fig. 1, abstract and supplied relevant document.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-5, 8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goetz, Vincent. Goetz, Vincent discloses the invention substantially as claimed as stated above stated steps such as the adsorption of gas on solid falls within the realm of common knowledge as obvious mechanical expedient and this illustrated by Goets, Vincent which teach the use of the reactors 10, 12 in various ways by desired opening closing the valves 22, 24, 26, 28 and 30. Therefore, Goetz, Vincent obviously read the above claims.

Allowable Subject Matter

Claims 9 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad M. Ali whose telephone number is 571-272-4806. The examiner can normally be reached on maxiflex.

Application/Control Number:
